**FOR IMMEDIATE RELEASE** *(Aug. 23, 2013)*

***Joe B. Jackson Parkway road construction continues***

**MURFREESBORO, Tenn.** – Work continues on the extension of Joe B. Jackson Parkway from Interstate 24 on the east to South Church Street (U.S. 231) on the west, Senior Public Works Inspector Jeff Jaco said.

Atmos Energy will install new steel and plastic lines from South Church Street to the end of Stevens Bend Subdivision, he said. There will be one flagging operation involved with the Atmos gas line installation.

Consolidated Utility District's contractor is lowering water lines on the side streets which include Annell, Cedar, Dorothy and Stevens Bend drives, he reported. A utility contractor is crossing the street with underground utilities at the dead end of the Stevens Bend Subdivision progressing toward County Farm Road.

Builders are continuing to build walls leading up to the bridge on the west side of the railroad and Middle Fork of the Stones River and the drilling of eight-foot shaft support columns east of the railroad. Bridge work will continue east and west of the railroad and river. Storm drain and grade work continues on the east side of the river to the Butler Road /Elam Road intersection.

No traffic interruptions are expected.
